DETAILED ACTION

Response to Amendment

The amendment filed on November 5, 2004 under 37 CFR 1.131 is sufficient to overcome the Zhu (US 6,100,863) reference.

Allowable Subject Matter

Claim's 19-26 are allowed.

The following is an examiner's statement of reasons for allowance: The applicant has entered the objected claims 11, 12, 15 and 17 into independent form in order for allowance.

Zhu teaches a video picture with reduced moving pixel distortion (MPD). This method defines more than N subfields in order to represent 2^N gray scale levels. This results in some gray scale values being able to be represented by multiple subfield combinations, that is to say multiple code values. The mapping memory then maps the intensity value of each respective pixel into a respective member of the selected set of minimum MPD codes. This then forms the set of minimum MPD codes so as to minimize moving pixel distortion on the display device between successive frames (Column 2, lines 1-22). However, Zhu fails to teach where the re-coding step includes a step of calculating drag coordinates for one or more of the sub-field code word bits of the current pixel based on the calculated motion vector, and where the drag coordinates are used for selecting a pixel in the video picture and using the corresponding bit of the sub-field code word of the selected pixel to determine the corresponding bit of the new

code word of the current pixel. A further search was conducted which failed to yield any prior art. Therefore, the prior art fails to teach or render obvious these limitations taken within the others in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
